DefiWawa

Can you reach an open defibrillator right now?

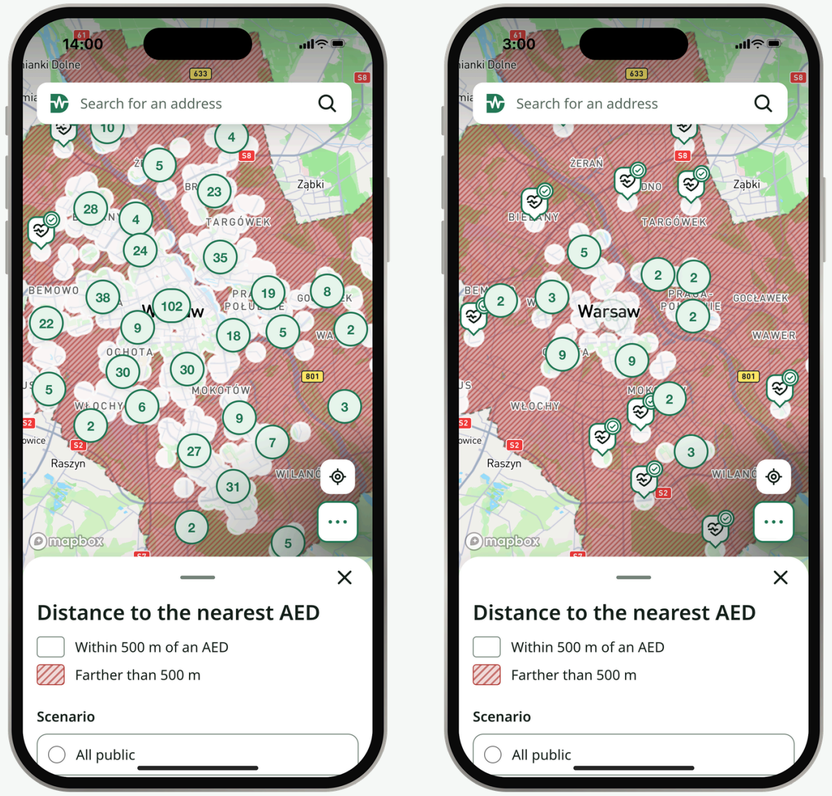

DefiWawa shows which Warsaw AEDs you can actually get to, at any hour of the week, and where the city has no open one nearby.

THE PROBLEM

A defibrillator locked at 3 a.m. is not a defibrillator.

Most of Warsaw’s AEDs hang inside offices, schools and metro stations. Maps show where they are, not whether you can get in.

Tue 14:00 · 569 open

Tue 03:00 · 93 open

White: within 500 m of an open AED. Red: none that close.

WHAT WE FOUND IN THE DATA

Residents within 500 m of an open AED

Our estimate. Even counting every AED with unknown hours as open, more than half of residents have none nearby at night.

Tuesday, 14:00

3 in 4

73% of residents. 569 AEDs open.

Tuesday, 03:00

1 in 5

20% of residents. 93 AEDs open.

WHY IT MATTERS

Heart disease is a real problem, every day

In cardiac arrest, every minute without a defibrillator lowers the chance of survival. An open AED nearby can change that.

1 in 3

deaths in Warsaw is from heart and circulatory disease: **5,800 of 17,254 in 2024.**

8 a day

cardiac arrests in Warsaw: **about 3,000 a year**, at the Polish rate of 170 per 100,000 people.

1 in 4

Poles have high blood pressure. About 1 million live with heart failure.

GUS 2024 - NFZ 2026 - Polish Resuscitation Council 2021

WHAT DEFIWAWA ADDS

Other maps show where. We show whether you can get in now.

One map for everyone who may need a defibrillator, ready to use today.

MAIN USERS

Residents

Nearest AED that is open, walking time, photo of the cabinet, how to get in.

ESPECIALLY

Volunteers

They know the app before the call and find an open AED in seconds when every minute counts.

AND

112

Dispatchers look up the nearest open AED for the caller.

AND

The city

Sees where AEDs are missing at night.

OPEN DATA

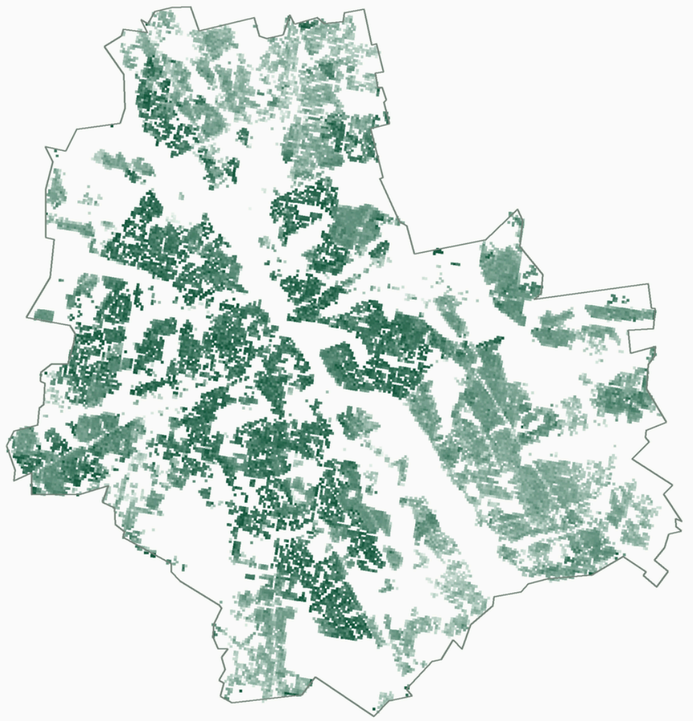

Built on Warsaw’s open data

Source	What it gives us
AED locations - dane.um.warszawa.pl	710 AEDs, hours, photos
Citizens’ budget - dane.um.warszawa.pl	Cost of an AED, 31 projects
Buildings, addresses - City of Warsaw	Where residents live
Census 2021 - GUS	Residents on a 1 km grid
OpenStreetMap	187 more public AEDs

HOW WE USE POPULATION DENSITY

The census grid, spread over 110,517 residential buildings by floor area: **1.9 million residents on 21,700 cells of 100 m.**

This is how we count who lives near an open AED, hour by hour.

Residents per 100 m cell, darker = more
